

BOLOGNESE METHOD FLOATS

Floats designed for the Bolognese method on waters with strong current. Bulky body gives them high buoyancy. They can be used in various methods i.e.: Bolognese, pole or whip.

Bolognese method floats

3U-04-	1g; 1,5g; 2g; 2,5g
3U-07-	1,5g; 2g; 3g; 3,5g; 4g
3U-08-	2g; 2,5g; 3g; 3,5g; 4g; 5g
3U-22-	2g; 3g; 4g; 5g
3U-24-	2g; 3g; 4g; 6g

MATCH METHOD FLOATS (WAGGLERS)

Floats designed for the match method. Wagglers made for the far-casting method on stillwaters or waters with a slow current. Due to their build (long antenna and heavy bottom) they are able to handle the lure easily even at a large wave. Smooth, aerodynamic shape gives them the ability to be cast on a long distance.

Match method floats (wagglers)

3A-01-	5+1g; 7+1g; 10+1g
3A-02-	4g; 6g; 8g; 10g
3A-03-	5g; 6g; 7g; 8g
3A-04-	4g; 5g; 6g; 8g
3A-05-	4+1g; 6+1g; 8+1g; 10+1g; 12+1g
3A-06-	3g; 4g; 5g; 6g

Match method floats. Models 3A-01 and 3A-02 were equipped with ailerons to give them the stability in flight. A common mistake made by the beginners is incorrect balancing the waggler (making the float too light so that the whole antenna pops out of water). A proper way to do that is to make the antenna hover about 1,5 to 4 centimeters above the water surface (according to the fishing conditions, sight and wave size) – only with such load the waggler will work.

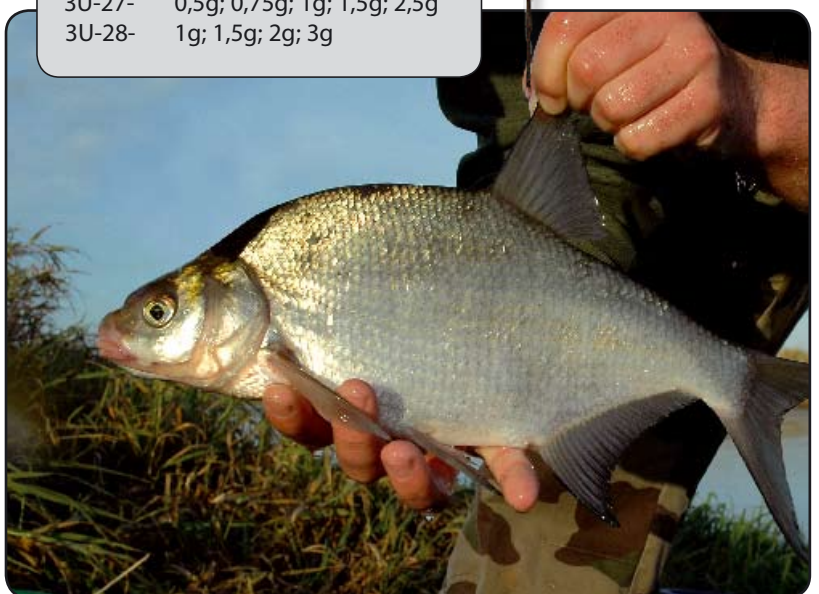

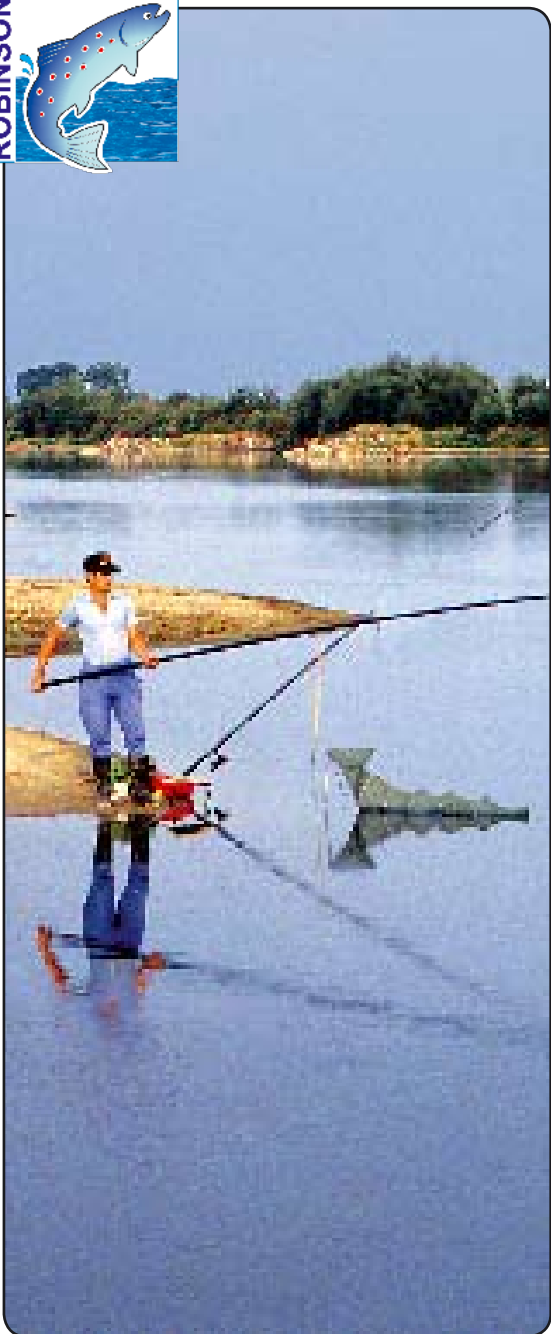

UNIVERSAL FLOATS

Universal floats designed for still waters – very smooth shape. Depending on the type of setting they may be used on waters matching the rod's length (two-point setting) or deeper (floats attached on leads). They are the most popular models used by float fishermen while fishing for roach, bream, crucian carp or other non-predator species.

Universal floats

FLOATS FOR LIVE BAIT

Floats for live bait are available in a wide range depending on the size of the used lures. High buoyancy prevents sinking. These floats are meant to be attached with lead method. The 3Z-02 model can be additionally equipped with a chemical light.

Floats for live bait

- 3Z-01- 8g; 10g; 12g
- 3Z-02- 8g; 12g; 15g

Floats with a chemical light are meant to be used during night. In our offer one will find models with a special chamber to which a light torch may be inserted. We also produce floats with a removable antenna to which a torch of equal diameter may be inserted.

Floats with a chemical light

- 3C-01- 1g; 1,5g; 2g; 2,5g; 3,5g
- 3C-02- 1g; 2g; 3g; 4g
- 3C-03- 3,5g; 5g; 6g; 8g
- 3C-04- 5g; 6g; 7g; 8g
- 3C-05- 2g; 3g; 4g; 5g
