

Landing Nets, Spikes

Landing nets addressed for competitors as well as for all fishermen using a delicate tackle. Triangular or round net frames. Folding. Very helpful in case of medium and small fish. The small net eyes protect against leader and float tangling. Net is made of material which doesn't absorb the smells. The stiff landing nets arms are made of light aluminium pipes of polygonal section. Long range of length regulation allows for easy use in different fishing conditions.

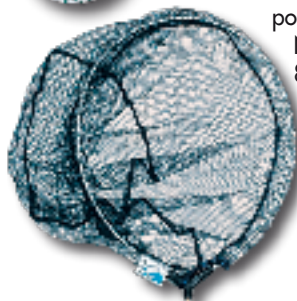

Universal Deluxe landing net. A revolution in this department – the Deluxe model has many features, which set it above any other landing net on the market!

The first one was made of a strong material, covered with a thin rubber layer, which becomes very slick when in contact with water – this prevents making any harm to the fish; they are in a better condition when you let them go. The rubber layer prevents the hooks from tangling. It's fixed with a tear-proof tape attached to the rim of the basket – its endings are equipped with additional plastic covers. The clip lock was made of super durable D.P. NYLON material, and the lock opener was made of fluorescent plastic which is visible at night.

Telescopic tube, made of anodized aluminium forged into a half-oval shape, which makes it 30 per cent more durable, and its setting is very easy (even with one hand).

· 87-KO-060
Circular shape of landing net, 60 cm, net material – mono polyamide.
Net eye size: 8 x 8 mm

· 87-KP-044
Oval shape of landing net, 40 cm. Net eye size: 6 x 6 mm

· 87-MU-045
Fly fishing landing net

XENON SUPER STRONG – Light and strong landing net spikes made of carbon fibre. Designed for different sizes of baskets. Indispensable while fishing with a shortened or full set. Excellent also when fishing with other methods with the use of light sets.

SANTANA TELE NET – spikes for landing nets. The must for float fishermen.
